Forecast for Friday 03 Sep 2021

Weather: A risk of the odd spot of drizzle during the early morning. Any low cloud will lift and start to break through the morning to leave a dry afternoon with sunny intervals.

Chance of cloud free mountain/hill tops above 600m: 40%, increasing to 60% by midday then 90% by the late afternoon.

Visibility: Good initially in clear spells. As cloud builds in from the east visibility is expected to be poor, and very poor above 500m with hills obscured by cloud. Cloud breaking and lifting through the morning to give patchy cloud at 800-900m by midday. Good to very good visibility below the cloud.

Meteorologist's View

Some uncertainty with regards to the speed of cloud breaking up through the morning. The sun remains strong even as we enter autumn with Moderate UV likely in any persistent sunshine into the afternoon.

Forecast for Saturday 04 Sep 2021

Weather: A cloudy start to the day with a chance of the odd spot of drizzle mainly in the east. A chance of some mist in the west after some clear spells overnight. Any low cloud with lift and break through the morning to leave a fine afternoon with sunny intervals.

Maximum wind: Easterly 10-15 mph, occasional gusts of 20 mph.

Chance of cloud free mountain/hill tops above 600m: 40%, increasing to 60-70% by midday then 90% by the afternoon.

Visibility: Good initially in clear spells. As cloud builds into the east visibility is expected to be poor, and very poor above 300-400m with hills obscured by cloud. Cloud breaking and lifting through the morning to give patchy cloud at 600-700m by midday. This continues through the afternoon with cloud lifting above the summits. Good to very good visibility below the cloud.

Temperature: **Valleys:** Plus 12 Celsius, increasing to plus 19 Celsius by the afternoon.

At 600m: Plus 09 Celsius, increasing to plus 13 Celsius.

Freezing level: Above the summits.
